

Southern Lower Gibsons DEM, DSM, and nDSM

DEM

Digital Elevation Model

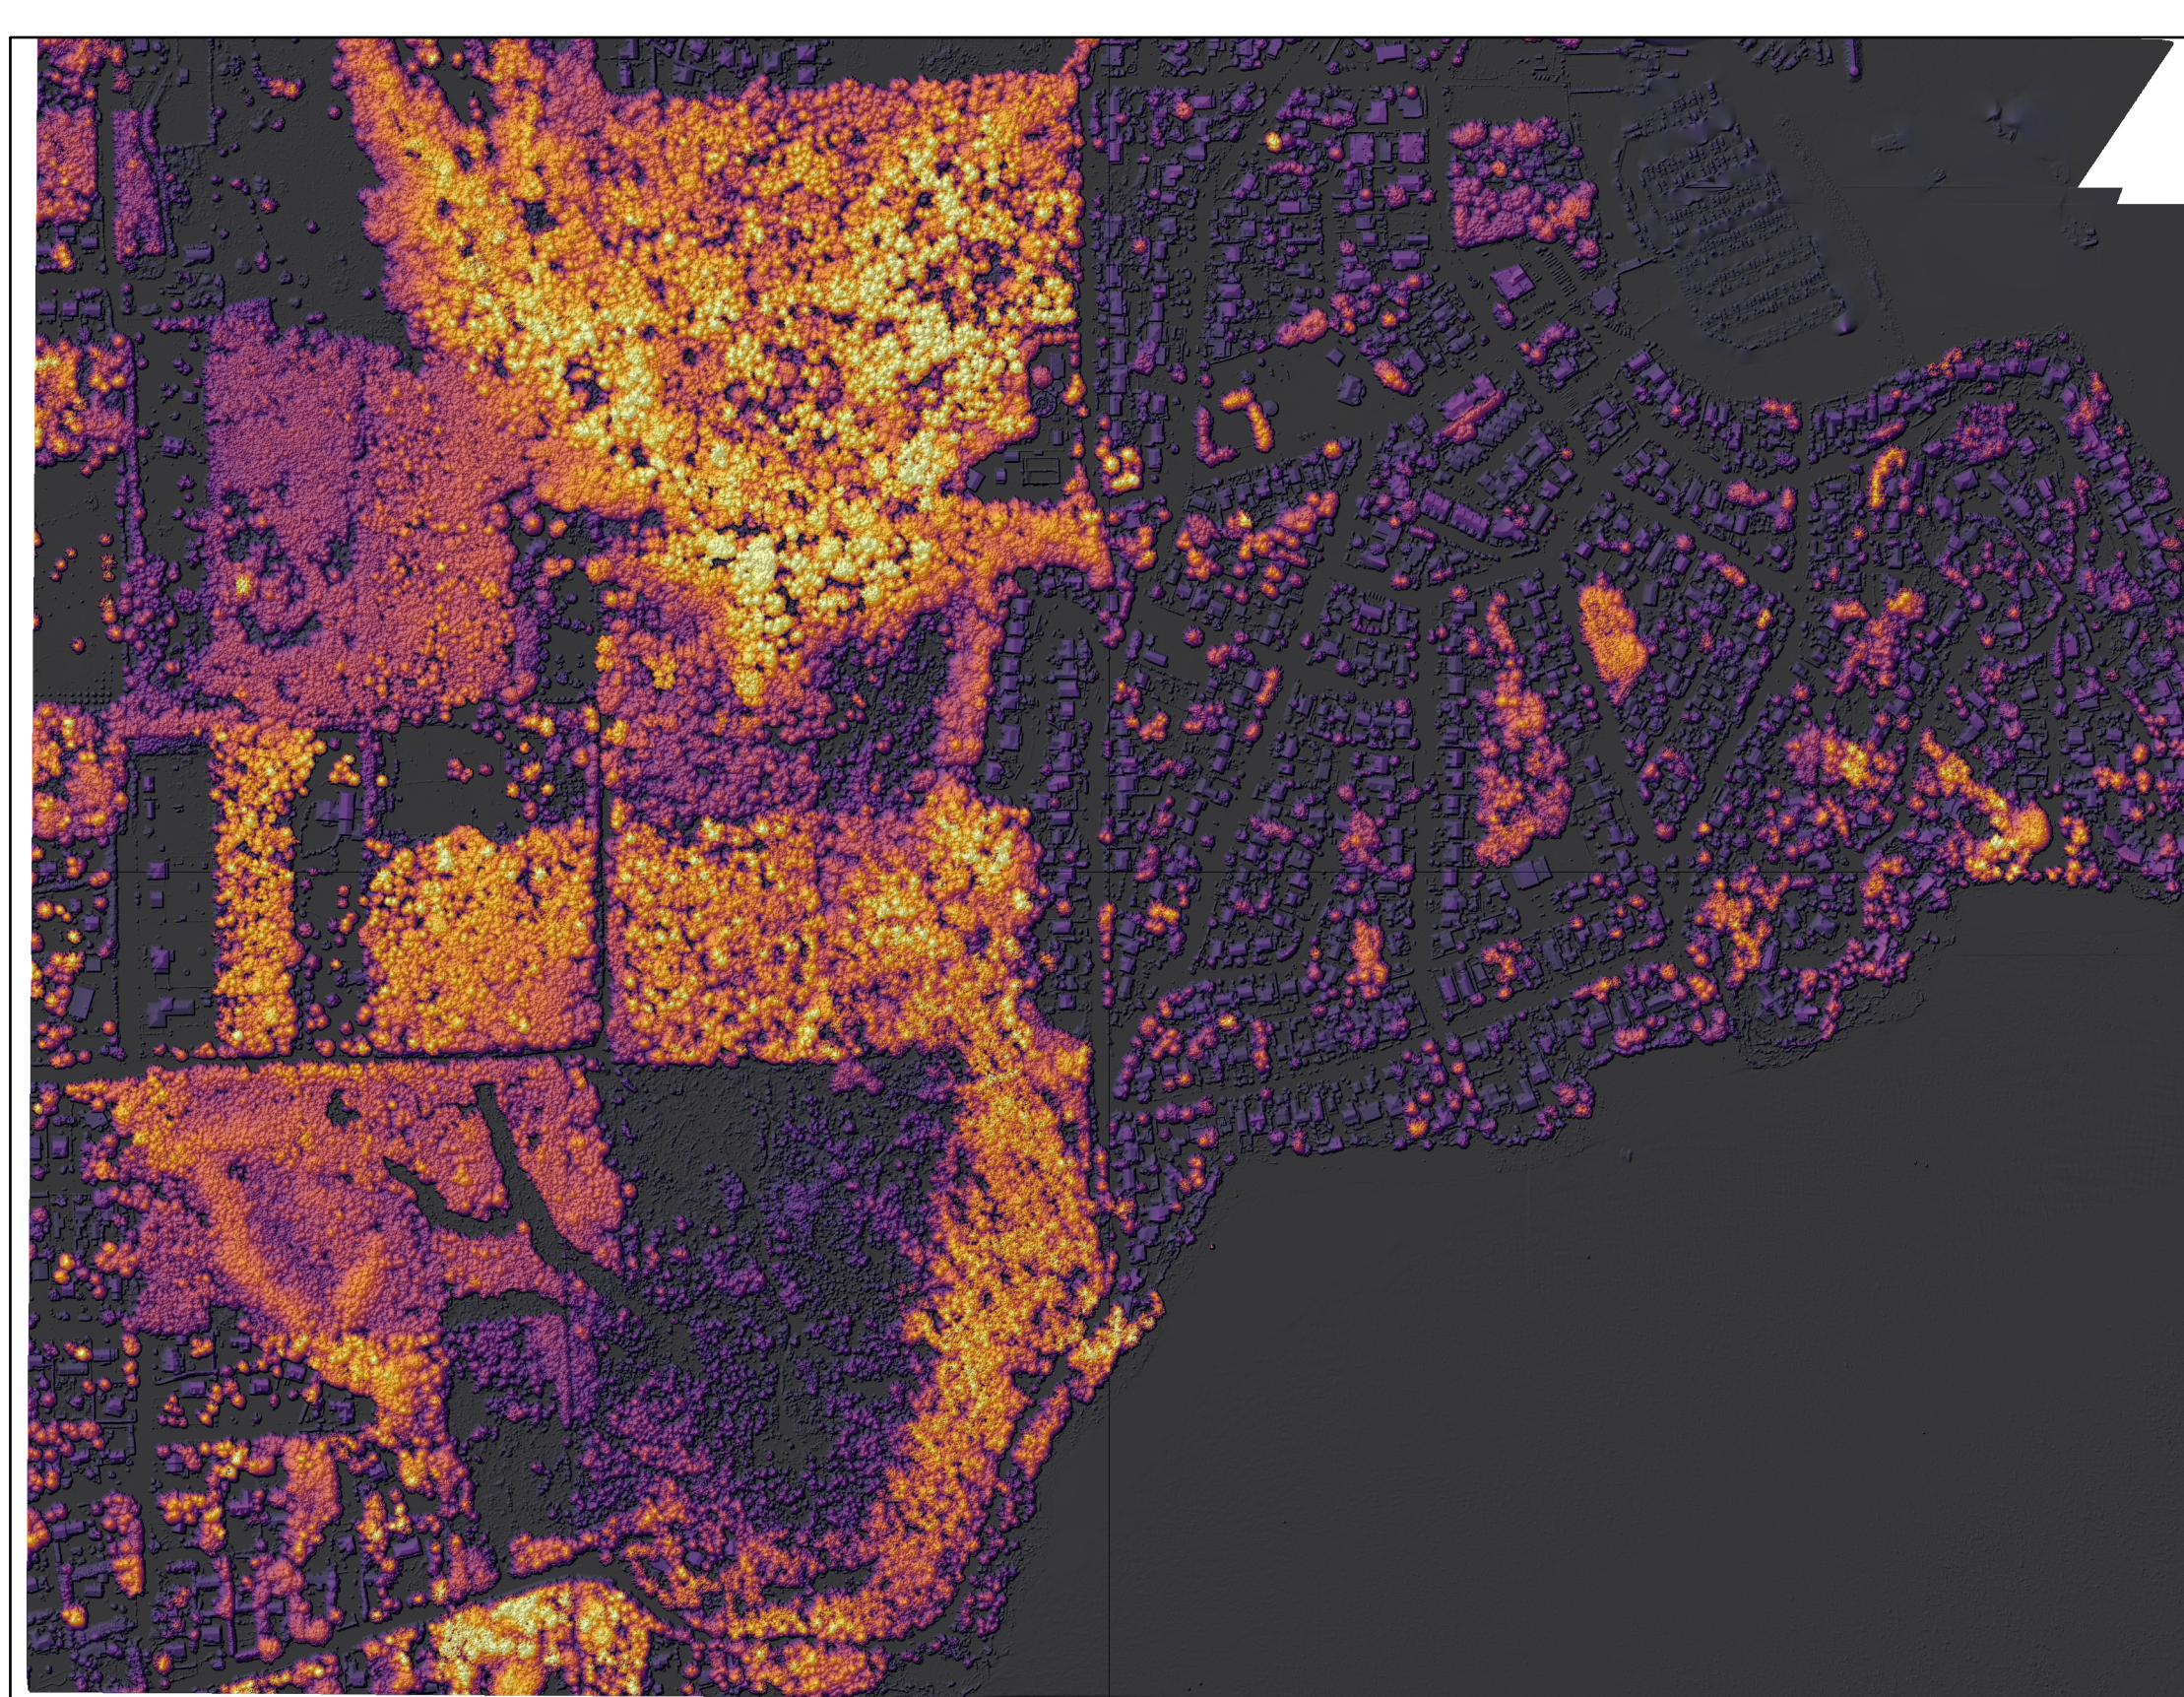

This image shows the elevations of the ground surface. Consider it a bare earth representation of the topographic surface, excluding trees.

DSM

Digital Surface Model

This image shows the elevations of all surface features. This model shows both environmental, and manmade features.

nDSM

Normalized Digital Elevation Model

This image shows the features on the surface with elevations relative to the ground height. It is calculated as the difference between the DSM and DEM.
